

Q&A

01 What is the pain during the Oligio procedure?

Oligio's unique intelligent cooling system and vibration mode minimize pain, allowing immediate treatment without a separate anesthesia process.

02 How long does the Oligio procedure take?

Oligio is a fast procedure and takes about 20 minutes for facial treatment. However, it may vary depending on the treatment area and the number of shots.

03 What should be noted immediately after Oligio treatment?

There is almost no swelling or bruising, so you can wash your face and make up right away, and it does not interfere with your daily life. However, for quick skin regeneration, please refrain from excessive exercise and alcohol consumption, and apply sunscreen carefully when going out.

04 What is the age range for Oligio treatment?

We recommend Oligio treatment from the mid-20s when aging begins.
